

REAL-TIME PRESCRIPTION BENEFIT

YOU HAVE LESS TIME WITH PATIENTS. GET THE MOST FROM IT.

Physician shortages and higher patient demands are making it harder than ever to spend time with your patients. And every second counts because those meaningful conversations can lead to improved adherence and increased days on therapy. Real-Time Prescription Benefit (RTPB) delivers a view of patient coverage details within your Electronic Health Record (EHR) in seconds, right at the point of care. This proactive insight saves you time and extra work, so you can focus on your patients instead of managing prescription changes.

Every piece of information counts

Real-Time Prescription Benefit saves time for you and your office staff by delivering the following information to your EHR within seconds:

- + Patients' out-of-pocket costs
- + Therapeutic options
- + Coverage alerts
- + Pharmacy choices

89%
OF PATIENTS

feel like they don't have enough time with their doctor

86%
OF DOCTORS

feel like they don't have enough time with their patients¹

It's no wonder everyone feels rushed since the average in-person visit **only lasts 12 minutes¹**

Every day on therapy counts

When you instantly access out-of-pocket costs, therapeutic options and pharmacy choices, you're empowered to guide patients to the therapy that's right for them – the first time. Save your patients the hassle of finding out their prescription isn't covered at the pharmacy counter or that they need a prior authorization (PA) before they can start treatment.

CASE STUDY

See why physicians count on RTPB

Discover how utilizing RTPB at the point of care saved a physician and their patient valuable time that resulted in the patient starting therapy faster.

A doctor examined a patient who was being treated for chronic pain

The doctor utilized RTPB directly in the exam room to explore options for therapy

A pain medication was requested that would require a PA

RTPB immediately brought the need for a PA to the doctor's attention

The doctor made an informed decision with their patient by prescribing an effective alternative which did not require a PA

The doctor and care team prevented extra work and the patient started an effective therapy faster

“RTPB saves time [and] empowers me to have a meaningful conversation with my patients.”

- Family Practice Physician since 1991

Express Scripts can help you start using RTPB directly within your EHR.
