

Holistic diabetes care

Express Scripts
By EVERNORTH

Value-based arrangements

If the diabetes treatment doesn't work, the client receives a reimbursement.

Increased adherence

Diabetes patients enrolled in the Patient Assurance® program were **30% more adherent to their treatment.**¹

Improved blood glucose levels

By incorporating remote monitoring and other care management tools, patients **improved their A1c levels an average of 0.2% in 90 days.**²

Reduction in medical costs

Total patient diabetes-related cost share decreased by **50.5% due to medical cost avoidance, or \$135M in total savings since 2020.**¹

Cross-condition support

Our comprehensive diabetes strategy helps manage interconnected conditions. For example, it **helped patients at risk for heart disease and stroke start statin therapy.**³

Patient affordability

Express Scripts capped the cost of insulin at **\$25 for patients in 2020.**

SIGNIFICANT CLIENT SAVINGS

Comprehensive diabetes care programs delivered over **\$2.4B in 2022 alone.**⁴
